About The Company

Priocom Solutions was founded on the simple belief that technology is today's main catalyst to the human's unlimited potential to create, innovate, and inspire.

At Priocom, we adopt this belief and leverage technology to create scalable, reliable solutions that create a foundation for your business. A foundation from which you can also create, innovate and inspire as you grow your business.

About Us

Priocom Solutions was founded on the simple belief that technology is today's main catalyst to the human's unlimited potential to create, innovate, and inspire.

At Priocom Solutions, we adopt this belief and leverage technology to create scalable and reliable solutions to create a foundation for your business; a foundation from which you can create, innovate and inspire as you grow your business.

Our Vision

To be Africa's leading innovator in digital access—technology powering innovation by creating scalable solutions that spark creativity, empower communities, and drive inclusive digital transformation.

Our Mission

To simplify and accelerate digital transformation by providing cutting-edge IT infrastructure solutions, intelligent automation, and accessible tech products that enhance productivity, reliability, and innovation across industries.

Our Values

At the heart of our company are values that drive meaningful impact: innovation to stay ahead in a fast-evolving tech landscape, excellence in every solution we deliver, and accessibility to ensure our tools serve all. We operate with integrity, adapt with agility, and design with empowerment in mind—so that every product and service helps people and businesses achieve more with less.

What We Offer

Products

- Computer MultiSeat Solutions
- All-in-one Label and Cable Printers
- Copper Fiber & Network Testers and Toolkits
- Computers, Peripherals and Networking equipment

Solutions

- ICT Installation & Lifecycle Management
- Labeling and Identification
- AI Workflow Automation
- Cable Testing, Qualification and Certification
- Low Code MVP and Software Development
- CCTV Installation & Intelligent Surveillance

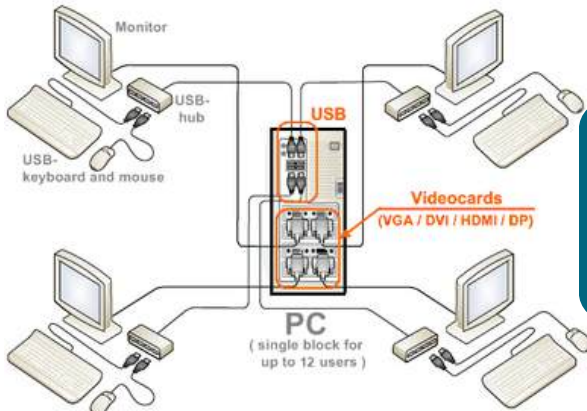

Our Products

At Priocom Solutions, we offer a range of innovative products designed to enhance productivity, streamline operations, and ensure reliability across various industries. Our products are built to provide scalable, cost-effective solutions that meet the evolving needs of businesses, schools, and organizations.

They include:

- Computer MultiSeat Solutions
- All-in-one Label and Cable Printers
- Multifunction Copper and Fiber Cable Testers
- Computers, Peripherals and Networking equipment

Computer Multiseat Solutions

Maximize existing computers, reduce computer acquisition and maintenance costs.

Priocom's MultiSeat Solutions enable multiple users to access a single PC simultaneously by connecting additional monitors and peripherals.

This approach maximizes existing computing resources, making it an ideal solution for schools, offices, and community centers with budget constraints.

It enables organizations to expand digital access without the need for costly hardware upgrades, fostering greater productivity and inclusivity at a fraction of the cost.

Priocom
MultiDesk

All-in-one Label and Cable Printers

Reliable end-to-end identification of your assets, cables and infrastructure.

Our Label Printers are designed to streamline the identification process for both cables and labels. These high-performance printers offer precision and durability, making it easy to create clear, durable labels for cables, equipment, and assets.

By efficiently printing custom labels with essential information, our printers ensure cables and equipment are properly identified, reducing errors and improving organization across workspaces, warehouses, and data centers.

Copper, Fiber and Network Testers and Toolkits

Ensuring Every Cable Meets Integrity and Performance Standards.

Priocom's MultiFunction Copper and Fiber Cable Testers and toolkits are essential equipment for ensuring the quality and reliability of network connections.

These multifunctional testers support copper and fiber optic cable verification, ensuring your network infrastructure is up to industry standards.

With these tools, businesses can confidently maintain high-performance networks, reduce downtime, and ensure the reliability of their IT systems, enabling smooth, uninterrupted connectivity.

Computers, Peripherals and Networking equipment

Providing Solutions and Infrastructure for Digital Transformation and Efficiency.

Priocom offers a comprehensive range of Computers, Peripherals, and Networking Equipment.

These products are selected to support seamless integration into your existing infrastructure, ensuring optimal performance and connectivity.

Whether you're setting up a new office, expanding an existing one, or upgrading your technology, our equipment is designed to meet the highest standards of reliability and efficiency.

Our Solutions

At Priocom Solutions, we deliver smart, scalable IT solutions that power innovation and efficiency. From infrastructure setup to intelligent automation, our solutions are built to simplify, optimize, and future-proof your operations.

- IT Installation & Lifecycle Management
- Labeling and Identification
- AI Workflow Automation
- Cable Testing, Qualification and Certification
- Low Code MVP and Software Development
- CCTV Installation & Intelligent Surveillance

IT Installation & Lifecycle Management

From Setup to
Support — IT That
Grows with You.

Our IT Installation & Lifecycle Management service covers every aspect of your technology infrastructure—from initial setup to ongoing support and maintenance.

We handle the complexities of installation and ensure that your systems are optimized for maximum efficiency and longevity.

This service enables businesses to focus on growth while leaving the management of their IT needs to experts, resulting in a streamlined, well-supported technology environment.

Labeling and Identification

Wrap-around labels

Tags

Component marking for patch panels, control panels, punch blocks, terminal blocks, breaker boxes

Control panels

Terminal block labels

Punch block & patch panel labels

Organize. Identify.
Optimize.

Our Labeling & Identification solutions help businesses implement clear and efficient labeling systems for equipment, cables, and assets.

With precise and customizable labeling, organizations can improve asset tracking, reduce misidentifications, and create more organized environments.

This service enhances overall operational efficiency, reduces the potential for mistakes, and ensures a smooth workflow, making management of resources easier and more effective.

AI Workflow Automation

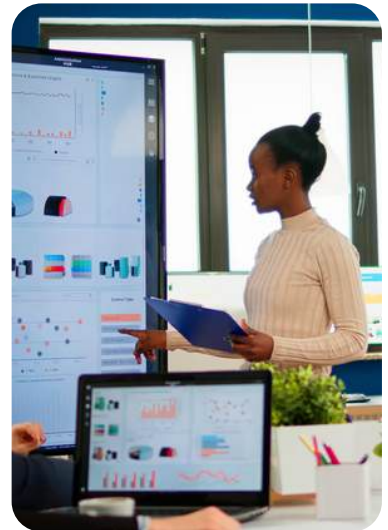

Smarter Workflows,
Faster Results.

Our AI Workflow Automation solutions use cutting-edge AI to streamline business processes and eliminate manual, repetitive tasks.

From automating customer service interactions to data entry and analysis, our solutions enhance productivity by speeding up workflows and reducing human error.

With AI-driven automation, businesses can achieve faster task completion, increased efficiency, and improved decision-making, allowing teams to focus on higher-value activities.

Cable Testing, Qualification & Certification

Tested for
Performance, Certified
for Reliability.

With Priocom's Cable Testing, Qualification & Certification solutions, businesses can ensure that their network cables meet rigorous quality standards.

Our advanced testing ensures the integrity of copper and fiber optic cables, reducing the risk of network issues and improving performance.

By using our solutions, companies can avoid costly disruptions and ensure their network infrastructure operates at peak performance, providing dependable connectivity for critical business operations.

Low-Code MVP & Software Development

Seamless Setup,
Ongoing Support.

Priocom's Low-Code MVP & Software Development solutions empower businesses to rapidly build and test minimum viable products (MVPs) with low-code platforms.

This fast-track approach enables businesses to bring products to market quicker, gather customer feedback, and iterate efficiently without significant upfront investment.

By leveraging low-code technology, companies can speed up product development, reduce costs, and better align with market needs, all while maintaining flexibility and agility in their approach.

CCTV Installation & Intelligent Surveillance

Smart Surveillance
for
Safer Spaces.

We offer professional CCTV installation solutions designed to enhance security, deter threats, and provide real-time monitoring for homes, businesses, and institutions.

Our solutions feature high-definition cameras, motion detection, night vision, and remote access via mobile or desktop. Whether it's a small office or a large facility, we tailor surveillance setups to meet your unique needs—ensuring safety, accountability, and peace of mind.

How We Work:

Our workflow and Processes

Project Initiation and Backlog Creation

Each project starts with a discovery phase where we gather requirements from the client. These are broken down into user stories and placed in our product backlog, whether we're working on hardware, software, or solutions.

Development and Execution

Our team collaborates closely to design, develop, and implement the solution. We focus on delivering high-quality results while continuously testing and refining the work to meet client specifications.

Review and Feedback

We hold regular review sessions with stakeholders to evaluate progress and gather feedback. This ensures the project aligns with the client's vision and allows for any adjustments before final delivery.

Delivery and Support

Upon completion, we deliver the solution and provide necessary training, deployment, or ongoing support to ensure seamless integration and client satisfaction. We continue to offer assistance, ensuring long-term success and smooth operation.
